BONWYKE ENSURES GUEST COMFORT WHILE UPGRADING YOUR HOTEL'S EXTERIOR

Lobby / Restaurant

Bonwyke eliminates glare and hotspots in your lobby or restaurant, enabling guests to enjoy their stay to the full – both night and day. And when security is a concern, our SafetyZone solutions combine break-in or blast protection with energy efficiency.

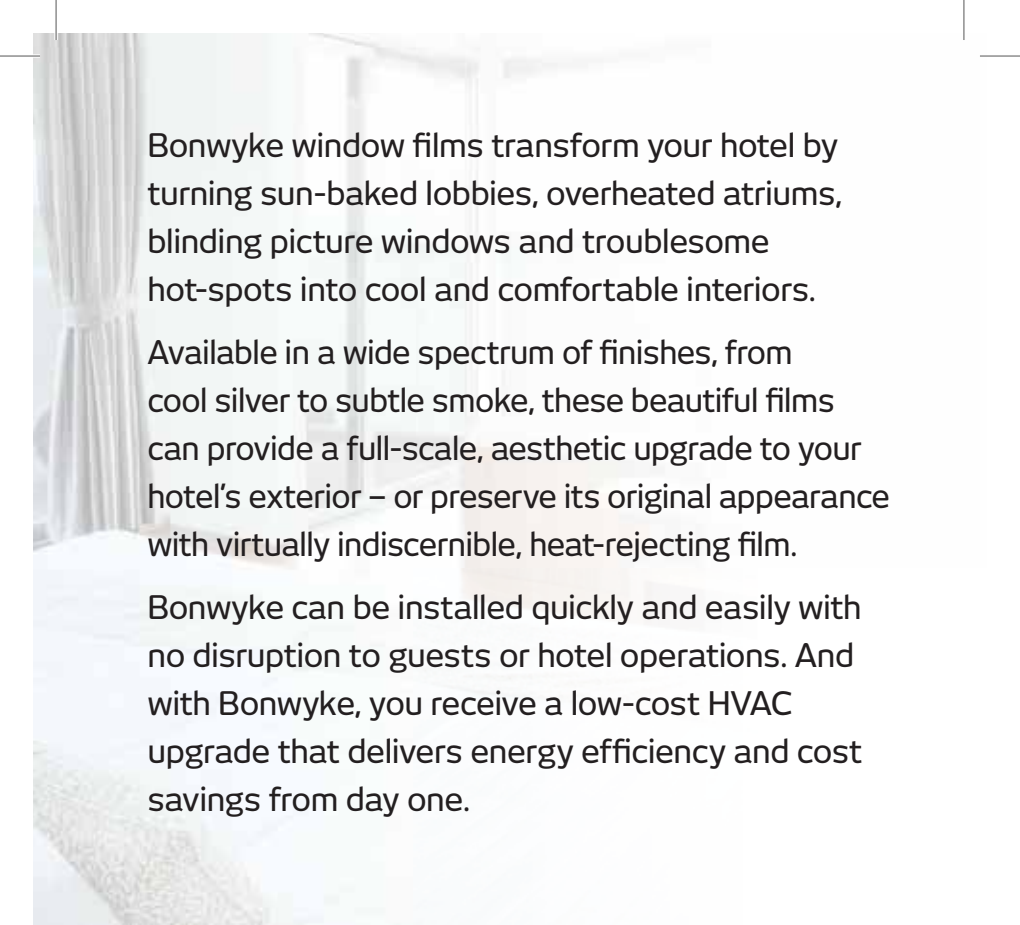

Rooms

Now, room curtains can stay wide open while temperatures remain enjoyably low. Guests will love how filtered sunlight keeps rooms bright but cool; you'll love the lower HVAC costs. And, with less UV radiation, you preserve the lifespan of furnishings and flooring.

Gym

Where glass safety is an issue, window films are the answer. With a wide range of options, Bonwyke Safe's anti-fragmentation solutions meet the unique challenges of each location, while rejecting heat and glare for enhanced comfort.

Bonwyke window films transform your hotel by turning sun-baked lobbies, overheated atriums, blinding picture windows and troublesome hot-spots into cool and comfortable interiors.

Available in a wide spectrum of finishes, from cool silver to subtle smoke, these beautiful films can provide a full-scale, aesthetic upgrade to your hotel's exterior – or preserve its original appearance with virtually indiscernible, heat-rejecting film.

Bonwyke can be installed quickly and easily with no disruption to guests or hotel operations. And with Bonwyke, you receive a low-cost HVAC upgrade that delivers energy efficiency and cost savings from day one.

Health Spa / Beauty Parlor

Adding privacy and designer elegance to doors, windows and room dividers, Bonwyke's selection of matte-white film finishes gives a translucent sandblast effect – the ideal touch for beauty parlors and health spas.

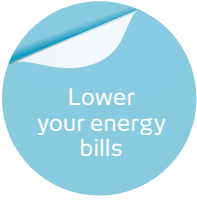

Convention Center / Conference Room

Bonwyke high-performance window films enable you to provide guests with today's most modern, energy-efficient meeting rooms, high-tech solutions keep large spaces cool, comfortable and glare-free, while keeping HVAC costs to a minimum.

Patio / Pool Skylights

Bonwyke's unique SkyLite solutions reduce solar energy by up to 80%. These advanced films, developed for glass or plastic glazing, keep roofs transparent and allow light in, while keeping glare, harmful UV radiation and infrared heat buildup out.

Bonwyke, the complete turnkey solution for a glazing upgrade, is today's most economic way to improve a building's functionality, provide significant long-term energy savings and ensure a swift return on investment. By cutting heat buildup, Bonwyke enables you to improve the operational efficiency of HVAC equipment, enhance your green rating and save up to 40% of energy costs.

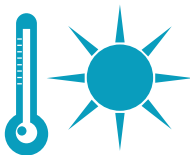

A WIDE RANGE OF BENEFITS FOR HOTEL OWNERS

Bonwyke can help you to:

1. Cut energy bills by up to 40%
2. Enhance guest comfort
3. Reduce solar heat gain by up to 80%
4. Cool guest rooms and public areas much faster
5. Upgrade hotel's green rating and certification
6. Upgrade hotel exterior with exclusive finishes
7. Disguise unsightly views and features
8. Preserve hotel's original façade with transparent finishes
9. Meet all safety standards for impact-resistant glass
10. Deliver break-in and blast protection
